DEVELOP A COSTOMIZED PING COMMAND TO TEST THE SERVER CONNECTIVITY

AIM:

To develop customized ping command in python that checks the connectivity between a client and a server by sending ICMP echo Request Packets and displaying the response time and status

REQUIREMENT:

Hardware:

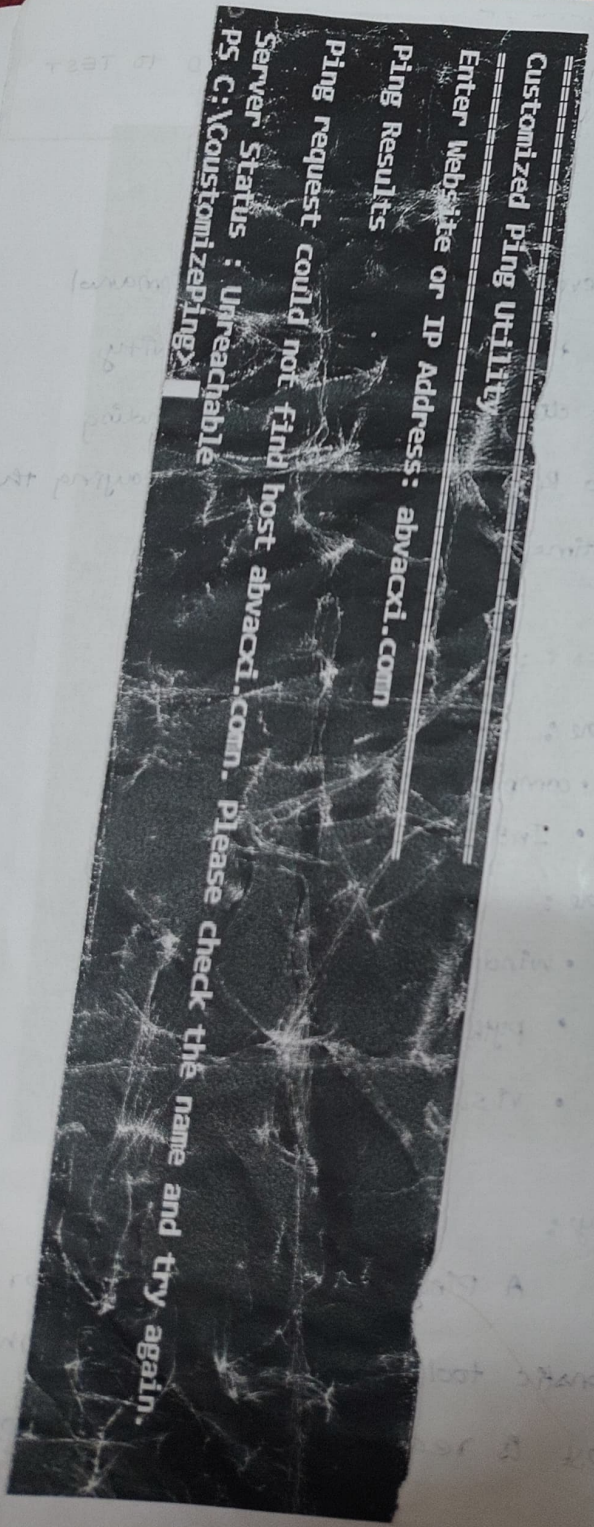

- computer / Laptop
- Internet connection

Software:

- Windows 10/11 or Ubuntu Linux
- python 3.10 or above
- Visual studio code

Theory:

A Ping command is a network diagonstic tool used to determine wheather a host is reached over a network

Working Procedure:

- Install python and VS code
- create python file named ping.py
- Import the required modules
- Accept the hostname or IP address as user
- detect the operating system
- using ping -n 4 or window
- Execute the ping command
- displays the ping output
- check the return outputs of
- display Reachable or unreachable

Result:

customized ping command to test the server connectivity is verified successfully
